

Clifford Dias, PE, PC is a professional engineering consulting firm, founded in New York City in 1983. Our engineering team provides efficient and effective engineering solutions to our professional clientele.

With professional engineering licenses in all fifty states, we are nationally recognized for our comprehensive consulting services consisting of design, evaluation, and review of new and existing structures. Our core capabilities span the areas of mechanical, electrical, telecommunication, plumbing, fire protection, and life safety.

We primarily serve national financial service firms, banks, insurance firms, publishing companies, real estate and law firms with our two office locations. Our head office is located in New York City's downtown financial district and our associate office is based in Los Angeles.

We offer you the opportunity to work in a highly collaborative team environment that heightens your individual skills by leveraging them with the skills of others. Our market-focused approach will expose you to high profile, technically sophisticated projects within specialized industries.

Our firm is committed to providing the advancement opportunities, continuous learning and skills training to accelerate your professional and personal growth. As a company, we value innovation and recognize individual contributions and reward you for your efforts.

For our New York office, the following positions are available

Entry to Senior Level Mechanical or Electrical Engineer with a minimum of 2 years experience

Duties & Responsibilities

The Design Engineer will be responsible for assisting in the design of various projects nationwide. Your design tasks will include creation of plans, schematics, equipment selection, load calculations, and specifications. This position requires the engineer to effectively and personably work with senior level associates in all efforts to execute each project. The preparation of the CAD design documents will be performed with each project. This person is expected to work closely with clients and project managers to ensure the success of each project from inception to completion. These responsibilities include attending project meetings, which will require traveling to project locations to perform surveys and other tasks.

Qualifications

- B.S., Mechanical or Electrical Engineering
- AutoCAD Proficiency
- U.S. Legal Work Status - Citizenship or Permanent Residency preferred
- Willingness to travel
- Excellent technical writing skill is essential
- Excellent verbal and written communication skills and presentation skills
- Strong evidence of successful solo and team participation.
- Strong evidence of effective planning, organization, and analytical skills
- Strong evidence of excelling at concept formation, problem solving and design implementation.
